# CREDENTIAL ASSESSMENT PROCESS

## Web Portal User's Guide for Applicants

FOREST PROFESSIONAL REGULATORS OF CANADA

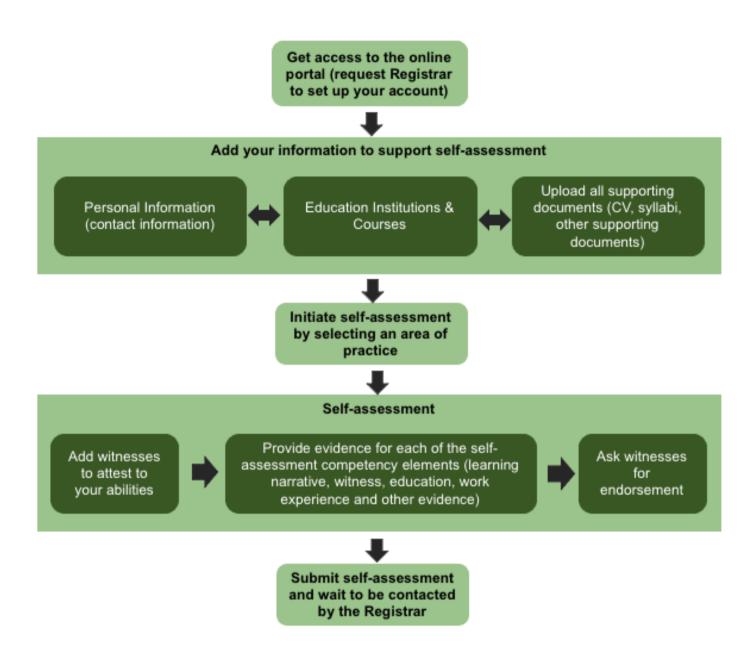

APRIL 2021

The purpose of Credential Assessment Process (CAP) is to assess if prospective applicants wishing to enter the profession meet the required competency standards. Suitable applicants for the CAP are graduates of Canadian or international post-secondary programs that are not accredited by the Canadian Forestry Accreditation Board (CFAB). CAP assessments are used by regulatory bodies to support competency requirement of applicants for licensure.

This users guide provides specific direction for applicants who will use the CAP web-based portal to submit self-assessments. The FPRC web portal is a comprehensive platform that allows:

- Applicants to upload evidence of academic and experiential learning to demonstrate conformance with national standards;
- Witnesses to attest to an applicant's competency;
- Assessors to review and assess an applicant against national standards; and,
- Provincial Registrars to manage all applications.

The flowchart below outlines the process and steps required for completing your selfassessment.

To help prepare ahead of your actual self-assessment, below is a table that can be used to identify the elements that your competency witness(es) will be willing to endorse and provide corresponding testimonials. This table is not required to be submitted or uploaded into the portal as part of your CAP portfolio.

In the table below, the witness will mark each competency element they are personally able to attest to the applicant's competency (only one of the Standards from 8A-E is required).

To download this table, click here.

To view a summary of the standards/competency element descriptions, click here.

### THE WEB PORTAL FOR APPLICANTS

Applicants should ensure their applications are well prepared, concise and contain all of the relevant information. This guide and associated information on the FPRC credential assessment website, together with on-going communications with the provincial regulatory body in the province applicants are seeking registration, are key to developing the application package.

#### All documents must be uploaded in PDF format.

**Introduction:** To start the Credential Assessment Process, applicants must contact the Registrar to set up an account. You can then access the web portal via the email you receive with your log in credentials, or by visiting the website below:

#### https://www.fprc-orfpc.ca/credential-assessments

The CAP web portal is the platform used to support your application. Your entire application must be submitted in digital format.

The first step is to create a profile by logging on. Once you are logged on, click on 'Personal Info' to create your profile.

**Personal Info:** Create your profile by clicking on the Personal Info tab.

In this tab you are adding in all relevant courses at each school to support your education background. To add courses for each school, click on then green arrow to the left of each school. Add all of the courses that you will use as evidence of your competency. This will form a drop down list of courses that you will draw from under the 'Self Assessment' section below.

Please include the course number or code and the course name. This may include undergraduate level courses, college level courses and other technical training. All academic courses listed must be supported by a copy of your official transcript from the relevant academic institution and listed in detailed course outlines. The details of other training courses taken outside of a course of study at an academic institution are entered as supporting documents below.

Please make sure click 'Save' after completing each screen to ensure your information is recorded.

The next tab is Documents, where supportive evidence is uploaded.

These documents are the supporting evidence of your competencies and are separated into three sections for course descriptions, CV and other supporting documents.

If you wish to replace a file with a different document, simply re-upload with the new file and it will automatically replace the former file.

If you wish to describe your role in creating supporting documents that you worked on, please compete the table found at **this link** and save it with your supporting documents.

Registrar's comment:		

This section includes course outlines, syllabi, CV, and other supporting documents including training course descriptions.

Please upload supporting documents one document at a time. Use a file name that will allow you to identify this file when you get to the Self Assessment section below. Course names and numbers must match official transcripts and names in course outlines.

You will also upload your Curriculum Vitae as well as other supporting documents from experiential learning that will be used as evidence to support your competency.

Please note: The documentation you provide to support your self assessment must be clear, comprehensive and relevant to professional practice.

Self Assessment: Choose an Area of Practice.

Self Assessme	nt		¥
Area of practice:	Select an area of practice	- 3	Submit
I ZAG RU	Forest Management (FORM)	2	the And SS
	Natural Resources and Ecosystem Management (NREM)		
	Urban Forestry (URBF)	No. con	
	Forest Operations (FOPR)	1º E	
	Ecological Restoration and Management (ERAM)	A.	

You now have all of the evidence in place to complete your Self Assessment.

The first step is to choose one of the five Areas of Practice that best represents your skills, knowledge and experience in forestry. Select your choice by clicking on the Area of Practice icon and clicking on your area of practice. Your provincial regulator will assist you in making your selection of the most appropriate area of practice.

For demonstrable competencies and competency elements that are not fully validated by your academic courses, you should have a witness attest to your abilities. The first step is to add in all of the witnesses you intend to use, including their names, phone numbers and email addresses.

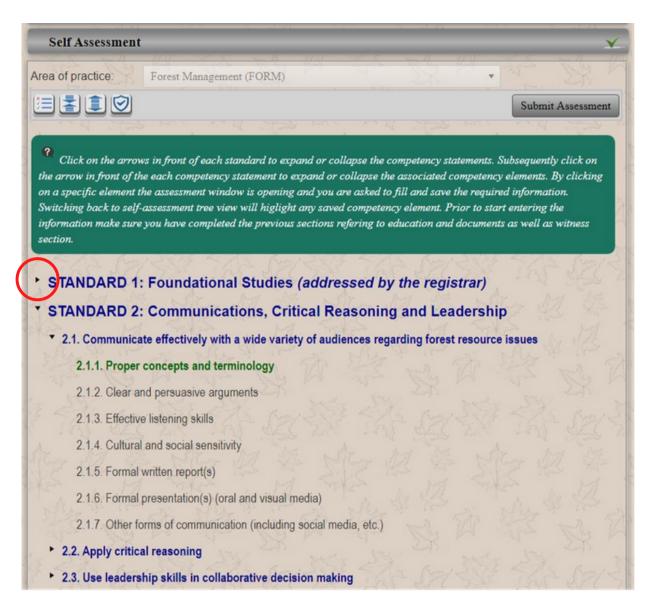

Witnesses will receive an email with instructions on how to support your self assessment.

You are now ready for the self assessment. Click on the checklist icon to see the full list of standards.

#### Self Assessment: Assessment Structure.

Next, click on the arrows to the left of each standard to expand or collapse the competency statements. Standard 1 is addressed by the Registrar of your provincial regulatory body and is not part of this section of the self assessment.

Each of the other standards are described by essential measurement points called demonstrable competencies. Competency Elements provide further context and guidance for each demonstrable competency.

You can then click on the arrow in front of each competency statement to expand or collapse the Competency Element.

Competency Elements that display in green are complete and saved, and black are incomplete.

Self Assessment: Providing evidence for each Competency Element.

For each element please provide evidence to support your competency. This includes a learning narrative, witnesses who can sign off on your competency, courses to support your academic credentials, and other evidence of experiential learning.

The learning narratives are not required where competency is fully supported by academic course work. Narratives must thoroughly but succinctly describe what knowledge was gained and/or what skills can now be applied in reference to a particular competency element as a result of experiential learning. Learning narratives are limited to 2000 characters per narrative.

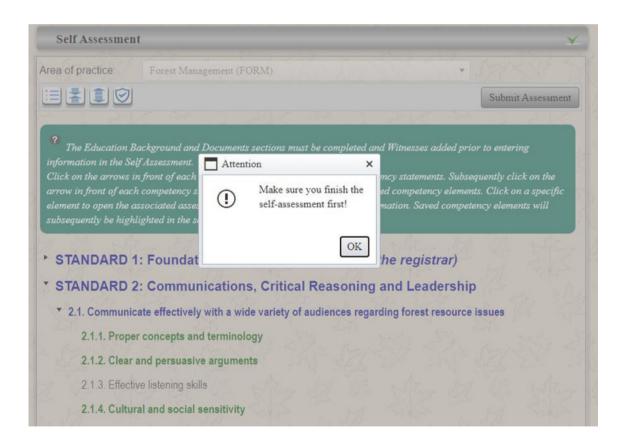

Explanations and the evidence referenced must address your competency to the level described by the action verb in the demonstrable competency.

Required qualifications, knowledge, skills, and competencies may be demonstrated from several sources, such as academic program content, documented experience and additional continuing education and workshops.

If you have experience in a field related to forestry, it is important to document the relevance of the experience as it relates to professional forestry.

When referencing multiple course outlines or supporting documents for a competency element, you must list them in order of significance to that specific competency element. The strongest evidence of their competency should be listed first.

Once you have completed this for each competency element you have finished your self assessment. Click the Submit Assessment tab in the top right of the screen. If completed correctly, the web portal will automatically forward your assessment to the next phase of the application. If incomplete, you may receive the following prompts:

Please ensure that you have completed each element of the self-assessment. Those that appear in black font still need to be filled out and saved.

You also may receive this message with an incomplete submission. All relevant witness endorsements must be received prior to submitting your assessment. Please wait until your witness endorsements are complete and then re-submit your assessment.
