Silviculture Technician

Employment Type: Contract
Location: Remote/Field Based

Flash Forest is a reforestation company that uses aerial mapping software, drone technology, automation, ecological science, and a lot of passion to reforest post-wildfire areas at a rapid pace. We accelerate the rate of reforestation worldwide. Instead of humans on the ground, we transfer the hard labour to drones. Living in the age of technology, we can effectively harness this to restore entire ecosystems, scaling the global quest for carbon neutrality. Flash Forest is here to tip the scales in the global ecological crisis.

This position is a field position with employment from May-July, 2025 with the primary location being remote.

Role & Responsibility

You will be working with the Silviculture and Plant Science Team to implement reforestation projects. Tasks include:

- Conduct field work, including site reconnaissance, layout, seedling assessments
- Support writing of the site plans and planting prescriptions
- Monitor forest restoration projects
- Reporting, record keeping, and communicating with project stakeholders
- Assist members of the Biological Research & Development Team and other Flash Forest staff on an as-needed basis
- Manage and work closely with the drone planting crew on the forestry team

Competencies & Qualifications

- Forestry experience tree planting, conducting site assessments (e.g., slope, soil, aspect, vegetation cover) and collecting pre- and post-treatment data is an asset, **but not required.**
- Registration as RPF/RPFT with the FPBC, AAFMP, ASFP, AMFP, OPFA or OIFQ is an asset, **but not required.**
- Previous experience supervising tree planting crews is an asset, **but not required**
- Experience in a start-up or fast-paced work environment is an asset **but not required**
- Image interpretation / remote sensing experience is an asset **but not required**
- Willingness to travel across Canada and work in remote locations **is required**
- Strong interpersonal & communication skills, as well as attention to detail is **required**; you will be working closely with various teams and individuals.
